

Let us work together for a positive result for your practice as we offer these courses Australia wide.

Inhouse Infection Control Training

Have you had a change in staff? Make sure you and all your team are all on the same page. Ensure infection control policies and procedures in your practice are compliant with AS/NZ 4815:2006 standards and the new 2021 ADA Infection Control Guidelines.

Our team's knowledge and experience in infection control will ensure a positive outcome for both your patients and your dental team. This course can also be run in conjunction with the **Surgical Infection Control workshop**

For more information on what the training includes, visit our website

<https://practicebasesolutions.com.au/> or

contact Sue Sandles on 0416 263 193

CPD points and certificates will be issued on the day.

Surgical Infection Control Workshop

Practice Base Solutions are pleased to present a surgical infection control workshop.

These workshops are conducted in dental surgeries

Do not miss this 2-hour training workshop opportunity for a professional, yet fun and engaging learning experience to ensure aseptic technique when doing implants or a surgical procedure. You will be guided through the process during the training session.

In this workshop each participant will be given a surgical PPE kit (which the participant keeps) and are paired up to play both roles of a scout and scrub nurse. Informative presentation folders will also be given out on the day.

This course can also be in conjunction with the **Inhouse Infection Control Training**

In house Introduction to Dental Nursing

Are you frustrated with untrained dental nurses? We can help by providing training of everyday duties of a dental nurse.

This course is tailored to suit the needs of your dental practice.

We look forward to hearing from you to discuss conducting these fun and engaging training courses in your practice.

Contact Sue for further information and secure your booking.
